Circular C. No. 7 of 1919-20, dated 5th August 1919.

In pursuance of Government Order No. 451-3—Edn. 35-18-59, dated the 11th July 1919, the following revised and consolidated rules regarding grants and maintenance of hostels (both Government and Aided) are issued for the general information and guidance of the Inspecting Officers and Managers of Aided Institutions :—

I. GOVERNMENT HOSTELS.

1. Establishment and Boarding charges including rent, where the hostel is located in a rented building, should be divided among the boarders who should bear the entire charges.

2. Where a Government building is provided for the hostel, room rent not exceeding Rs. 4 per mensem for each room should be charged to secure a fair return on the total capital outlay. Where owing to peculiar conditions, the levy of rent fixed may operate as a hardship, some reduction may be allowed with the prior approval of the Department.

3. Equipment charges will be borne entirely by Government.

4. The full cost of the educational supervision will be borne by Government, the grant allowed on this behalf varying from Rs. 10 to Rs. 30 per mensem according to the grade of institution and the qualification of the educational supervisor.

II. AIDED HOSTELS.

1. *Accommodation* :—For a period of five years from the date of the Government Order the building grant to be given to hostels is raised from $\frac{1}{3}$ to $\frac{1}{2}$ the cost of the building subject to the following conditions :—

(*a*) The hostels should be under departmental supervision and all regulations for enforcing discipline, etc., among the students should be complied with.

(*b*) Plans, etc., should be approved by the department.

(*c*) In case the building for the construction of which a grant is given by Government is at any time used for any purposes other than as a hostel without previous sanction of the department, the grant may be required to be refunded or the building taken over by the department on payment of the share of the cost of the construction borne by the private agency under the Grant-in-aid Rules.

2. A grant equal to $\frac{1}{3}$ of the pay or Rs. 7 per mensem whichever is less will be given in aid of the pay of the Manager. The function of the Manager will be to look after the boarding arrangements and the general up-keep of the hostel in an efficient condition.

3. one-third of the cost of the equipment and $\frac{1}{3}$ of the rent, if a building is rented for hostel purposes, will be given by Government.

4. A grant towards the pay of the educational supervisor ranging from Rs. 10 to Rs. 30 according to the grade of the institution will also be paid by Government.

III. GENERAL RULES APPLICABLE TO BOTH KINDS OF HOSTELS.

1. (*a*) Every hostel should have an educational supervisor.

(*b*) As a rule no educational supervisor should be appointed without the previous approval of the department. But in urgent cases, the appointment may be made, subject to the approval of the department, which should be obtained within one month from the date of the appointment, otherwise, the grant for this item will be withheld.

(*c*) In Government hostels an Assistant Master of the Institution to which the hostel is attached should be appointed as educational supervisor and in no case should the same teacher be appointed for more than two years at a time.

(*d*) Teachers who have undergone Scout or physical training should be preferred for this appointment in all cases.

(*e*) In sending up proposals for the appointment of educational supervisors, the following information should invariably be given :—

Name.—Educational qualifications. Service. Pay. Number of hours of work in the hostel.

(*f*) The duties of a supervisor shall be not only to look after the studies and work of the boarders but also to organise games and pastimes of a healthy character among the boarders on the model of the Y. M. C. A.

(2). In no hostel should students be lodged two by two in each room. As a rule, every room should accommodate 3 or more boarders.

(3) In the case of hostels attached to the Training Institutions in which *only* teachers under training are accommodated, and hostels intended for girls or depressed classes, the full cost of establishment and rent will be borne by Government for a period of three years from the date of the Government Order.

IV. In addition to the above rules, the general provisions of the Mysore Educational Grant-in-aid Code will also apply.

4. Priority certificates were issued for the import of only 240 tons of Bengal rice, only 56 tons of wheat from the Central Provinces and all the 400 tons of Bengal gram. The actual imports were 800 tons of Bengal rice consisting of the balance that remained to be imported in previous months, 22 tons of wheat and 157 tons of Bengal gram. The whole of the Bengal rice was not taken up as the local merchants found the prevailing rates at Bengal too high for the rice to find a market here. The whole of the wheat from the Central Provinces was not taken up as quantities certificated during the previous months had not been secured for want of stocks and such quantities as had been obtained could not be booked owing to congestion of Railway traffic.

VI. Installation of the Cauvery Power Scheme.

READ—

Letter No. H. 19404-350, dated 15th February 1919, from the Chief Electrical Engineer, submitting for sanction a modified estimate amounting to Rs. 32,92,000, (in round figures) for the VI. Installation of the Cauvery Power Scheme.

2. Notes by the Public Works Secretary, ending with No. C. P. S. 119, dated 30th May 1919, recommending sanction to the estimate submitted by the Chief Electrical Engineer.

ORDER No. E. D. S. 141-3, DATED 20TH AUGUST 1919.

Eversince the inception of the Cauvery Power Scheme, the demand for power has been uniformly increasing, and to cope with it, fresh additions have been made to the generating plant from time to time.

2. There are at present 15 units at the generating station with a capacity of 22,650 H. P., as per details given below:—

11 of 1,150 H. P. ...	12,650 H. P.
3 of 2,000 H. P. ...	6,000 H. P.
1 of 4,000 H. P. ...	4,000 H. P.
Total ...	22,650 H. P.

The power actually generated is, however, 21,500 H. P., as one unit of 1150 H. P. is always kept in reserve.

3 The aggregate demand on the generating station during the year 1917-18 was 19,230 H. P. The Mining Companies on the Kolar Gold Fields have now notified that the power supply to them should be further increased by 2,500 H. P. They also require an additional block of 3,200 H. P. for hoisting purposes and for intermittent power supply. Another 2,000 H. P. is required to be provided for industrial purposes in Bangalore and Mysore Cities. The total demand in the immediate future is, therefore, expected to increase to 27,000 H. P. roughly.

4. But the power actually generated at present is only 21,500 H. P. To maintain a constant supply of this amount, there is the immediate need to replace the 11 small turbines with new Francis turbines and to duplicate the low tension busses, as they are obsolete and have served out their time, their efficiency being affected considerably. The cost of reconstructing the 11 turbines and maintaining them on a level of efficiency and of duplicating the busses, including the extension of the step-up transformer house, is estimated at Rs. 13,63,400.

5. The scheme under consideration is designed to meet the prospective demand by increasing the capacity of the generating station from 22,650 to 27,000 H. P. net, with a spare capacity of 3,600 H. P. This is proposed to be effected by remodelling the generating station and replacing the 11 units of 1,150 H. P. each, as shown below:—

5 units of 4,000 H. P. ...	20,000 H. P.
3 units of 2,000 H. P. ...	6,000 H. P.
4 units of 1,150 H. P. ...	4,600 H. P.
Total ...	30,600 H. P.

6. Another important feature of the scheme is to shift the Transformer Station from the head of the Bluff where it is now situated and to reconstruct it at the foot, as an extension of the present generating station. This is calculated to result not only in better efficiency but also in facilitating economical maintenance of plant, etc.

7. After the completion of the first stage of the Krishnarajasagara Dam, the calculated minimum flow available in the river during the summer months is 750 cusecs. The extension now proposed is therefore limited to 27,000 E. H. P. net. With the second stage of the reservoir, the minimum flow available at Sivasamudram will be 900 cusecs. It will then be possible to generate 32,000 H. P. The proposed work is so arranged that further additions can be undertaken at any time without much material alteration.

8. The VI. Installation of the Cauvery Power Scheme being the most urgent and important of the works of development in the Electrical Department, Government are pleased to accord general administrative sanction to the modified proposals estimated to cost Rs. 32,92,000 which is made up as follows:—

(1) Rs. 11,48,081 for replacing the 11 small turbines reported to be obsolete.

(2) Rs. 21,43,919 for rearranging and extending the capacity of the plant from 22,650 to 30,600 H. P.

The outlay under (1) will be debited to the Depreciation account and that under (2) to the Capital account.

9. The Financial Secretary is requested to provide 5 lakhs of rupees for the work in the capital programme of 1919-20 by a redistribution of the grant of 90 lakhs already provided therein.

10. Before the estimates are finally sanctioned, they will be got examined by a recognised Consulting Engineer in England or America.

11. The Chief Electrical Engineer is, however, authorised to incur an expenditure up to 5 lakhs, being the grant allotted to this work during the current year.

Secretary to Government,

If spare copies exceeding 100 in number are required, the department concerned should supply the required quantity of paper.
